The Wash Pit

The Wash Pit

The wash pit is completely portable for fast set up with four separate, inflatable chambers. Made of heavy -duty 40 mil PVC for years of service. The Wash Pit quickly packs away for storage when not in use. 150 lbs.

Three stock sizes: _____
#310203 – 16 x 20
#340202 – 12 x 10
#340201 – 16 x 12

Rug Roller #440421

The Rug Roller works like a squeegee for rugs. It is designed to effectively move water out of a rug using hand pressure from the operator. It is an essential tool for all in-plant, Oriental rug cleaning operations. Roller is compact and lightweight. The rollers are made of polyurethane, non-marking, chemically resistant material.

Oriental Rug Brushes

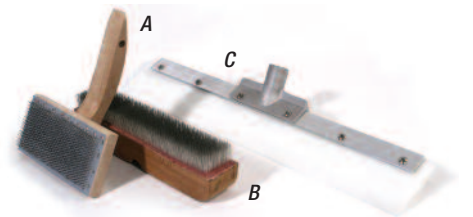

Ideal for removing animal hair, lint and piling on oriental and specialty rugs. Made of rust-resistant cadmium plated wire secured to a hard wood block. Wire pattern designed for maximum penetration.

- A. Fringe Carding Brush #510071
- B. 8-inch Oriental Rug Brush #510073

Oriental Rug Squeegee

For quick removal of excess water. Specially designed carpet squeegee with 3/8" thick beveled polyethylene blade, which glides over rug. Blade is 18" wide and 3.25" high attached to light weight but strong aluminum angle backing.

- C. Rug Squeegee #510075

Oriental Rug Rotary Brush

This brush allows for superior carpet cleaning and ease of machine operation! A unique, adjustable glider supports the weight of the machine and reduces friction, making the floor machine glide easily over the carpet. The .025 gauge polypropylene bristles remain standing straight so the tips do the cleaning.

Two sizes available:
#330045 – 15"
#330048 – 18"

A Comprehensive Guide to Oriental & Specialty Rug Cleaning

By Ellen Amirkhan & Aaron Groseclose

A Comprehensive Guide to Oriental & Specialty Rug Cleaning is the only book published on this topic. Over 400 pages and 780 color photographs, maps and drawings illustrate how to clean, inspect and identify most types of rugs.

The authoritative manual and reference book for the rug cleaning professional.

MasterBlend®

#1 URINE DECONTAMINATION SYSTEM FOR RUGS

- 1) Qualify the rug with your customer as urine damage may cause bleeding during immersion. Also, staining from urine often is permanent on natural fibers. First dust the rug.
- 2) If the rug is extremely urine damaged spray rug front and back with At Last and let sit for ½ hour.
- 3) Put rug in immersion pit and saturate with water. Mix one pint of Urine Lock and one pint of Skunk Odor Control in 5 gallons of water for a 9x12 piled rug, adjust amount of product based on rug size. Pour 1/3 of the diluted product on the rug back and shampoo. Then turn the rug over and pour the balance on the rug pile and shampoo.
- 4) Add water until the rug is covered with 2 to 3 inches - then roll the face of the rug using the MasterBlend Rug Roller.
- 5) Let rug soak for 3 to 4 hours rolling the rug each hour.
- 6) Drain water from pit and flush with fresh water while rolling rug. Continue until the rinse water is clear. Then wash the rug with your normal process.
- 7) Allow rug to dry - if dye bleed is a concern dry the rug flat.
- 8) If the rug has a dog fur smell add an additional pint of Urine Lock to the process listed above. If the rug has fire/smoke odor substitute Air Wash for the Skunk Odor Control.
